What is
ETRONIC?

The automatic bioethanol fireplace is a combination of elegance, comfort, and modern technology. The device uses liquid biofuel based on bioethanol, which produces a real flame when burning.

Thanks to the use of an electronic control system, lighting and extinguishing the flame is fully automatic – all it takes is the push of a button on the remote control or the touch panel. The safety system monitors temperature, fuel level, and oxygen concentration, ensuring safe and worry-free operation.
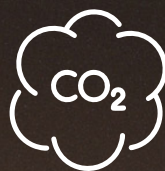

REAL FIRE
UNDER CONTROL

A REAL FLAME WITHOUT THE NEED FOR A CHIMNEY. AN ECO-FRIENDLY SOLUTION NO SMOKE, NO GAS, OR ASH.

USER SAFETY

THE SAFETY SYSTEM
MONITORS
THE TEMPERATURE
AND FUEL LEVEL

MINIMAL CO$_2$ EMISSIONS

COMBUSTION PRODUCES
WATER VAPOR AND A SMALL
