ABOUT US

Wild Flame is a leading manufacturer of premium bioethanol fireplaces, combining innovative technology, exceptional craftsmanship, and contemporary design. Our mission is to create elegant fireplace solutions that bring the beauty of real flames into modern living spaces while offering a clean, sustainable alternative to traditional fireplaces.

Designed and manufactured with precision, our extensive collection includes built-in, freestanding, and fully customized bioethanol fireplaces for residential, commercial, and hospitality environments. Every Wild Flame fireplace is engineered to deliver an authentic flame experience without the need for a chimney, gas connection, or electricity, providing complete design freedom for architects, interior designers, developers, and homeowners.

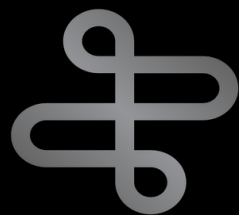

Quality is at the core of everything we do. We use carefully selected materials, advanced manufacturing techniques, and strict quality control processes to ensure every fireplace meets the highest standards of safety, durability, and performance. Continuous product development allows us to combine cutting-edge technology with refined aesthetics, creating fireplaces that complement both contemporary and classic interiors.

At Wild Flame, we believe that fire is more than a source of warmth it creates atmosphere, enhances architecture, and brings people together. Our commitment to innovation, reliability, and outstanding design has made Wild Flame a trusted partner for dealers, architects, designers, and distributors around the world.

Why Choose Wild Flame?

- Manufacturer with in-house design, engineering, and production.
- Premium-quality bioethanol burners and fireplace systems.
- Modern, elegant designs with bespoke customization options.
- Safe, clean-burning, and environmentally conscious technology.
- No chimney, gas connection, or flue required.
- Ideal for residential, hospitality, retail, and commercial projects.
- Reliable partner for international dealers, distributors, and project developers.

Wild Flame represents the perfect balance of innovation, craftsmanship, and timeless design. Our bioethanol fireplaces transform interiors with the warmth and beauty of real flames, creating unforgettable spaces where people live, work, and connect.

FEATURES

- Contemporary Elegance: A refined two-sided corner fireplace designed to complement modern living spaces.
- Authentic Flame Experience: Creates beautiful, natural-looking flames without smoke, ash, or the maintenance of a wood-burning fireplace.
- Eco-Conscious Heating: Powered by clean-burning bioethanol, offering a more environmentally responsible fireplace solution.
- Flexible Built-In Installation: Designed for seamless integration into a wide range of interior layouts, making it suitable for almost any room.

WHERE DESIGN, WARMTH, AND ATMOSPHERE COME TOGETHER.

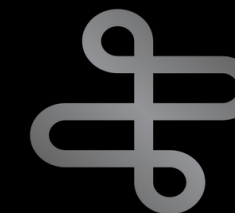

This elegant corner fireplace is seamlessly integrated into a sleek architectural enclosure, creating a perfect balance between fire and design. Its three-sided glass configuration offers stunning views of the flames from multiple angles, while the clean lines and dark finish give the fireplace a sophisticated, contemporary appearance.

The floating design of the enclosure enhances the sense of space and transforms the fireplace into a striking focal point within the interior. Minimal glass framing and the open corner design maximize the panoramic flame view, creating a warm and inviting atmosphere that naturally connects adjacent living spaces.

Horizontal **SAINT**
BUILT-IN INDOOR

FEATURES

- Panoramic U-Shaped Design: A stylish three-sided room divider fireplace that creates an impressive view of the flames from multiple angles.
- Perfect for Room Dividers: Engineered for built-in installation within partition walls, adding warmth and visual separation without closing off the space.
- Premium Quality Construction: Manufactured from durable, high-grade materials for reliable performance, elegant aesthetics, and long-lasting durability.
